

# Stan Dawes Fencing Supply & Install Bastion

## QUANTUM GATE

The Bastion ContouRail Quantum gate has been designed to meet and exceed the requirements of RoSPA guidelines. It is a 'safe' design ensuring that there is no risk of neck, head and finger entrapment. Manufactured with a unique self closing device. It is an ideal design for parks and playgrounds. It has been tested for longevity and after over 500,000 cycles is still reliably operated. The width of the gate is nominally 1400mm, making it wheelchair friendly.

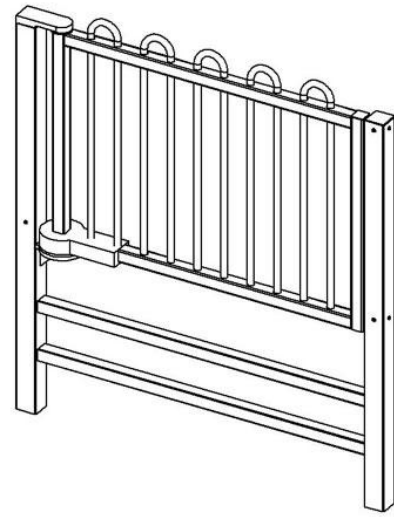

**SAFETY** - Complies to RoSPA guidelines in respect of no areas for entrapment

**FUNCTIONALITY** - two stage closer for 'soft' non aggressive closing. Wheelchair accessible

**RELIABILITY** - Incorporates a closer that is tested to 500,000 cycles achieving years of service Fully framed, easy to install and maintenance free

### STYLES AND FINISH

The Quantum gate is available in a choice of seven standard colours: white, black, blue, grey and three shades of green.

### TECHNICAL SPECIFICATION

The gate is delivered fully framed, and is easy to install as it is already fitted directly to the gate posts.

The gate does not use traditional hinges but is mounted on bearings eliminating the need for readjustments.

Railings are fitted directly to the gate posts so additional posts are not required.

Vandal resistant – Internal mechanism prevents the closer from being subjected to external forces greatly reducing the risk of failure due to vandalism.

Playground specification Bow Top railing is welded into the gate frame.

## THE QUANTUM SELF CLOSING GATE
